Icom's M510 Awarded Best VHF Radio at NMEA 2022

KIRKLAND, Wash. (October 2022) – At this year's NMEA Marine Electronics Conference and Expo's awards banquet, our popular **M510** radio was presented the 2022 award for Best VHF Radio Product. In previous years, Icom's M605 (2017-2021) and M506 (2014-2016) have also received NMEA accolades.

The M510 is a Class-D DSC VHF marine transceiver with wireless capabilities and is a powerhouse tough enough for the commercial market yet refined for the recreational boater. With the ability to receive AIS signals (AIS version only), see surrounding vessel traffic in real-time, and directly make individual DSC calls to selected targets. At nearly half the depth of the M506, installation location options are wide open. The 3.5" color TFT LCD provides a wide viewing angle and high-resolution characters and icons for supreme readability, even in low light with night mode. Front and back connection ports allow an additional wired station using a COMMANDMIC™.

NMEA Marine Electronics Conference and Expo is North America's largest event for the marine electronics industry and is the place to connect with the best minds in the business. Please visit their [website](#) for future event information.

Our marine radios are rugged, innovative, and full of industry firsts. From the first submersible radios to the first floating radios and many features in between, Icom continues to stand the test of time with leading-edge, forward-thinking. Boaters the world over choose Icom for their legendary durability, quality, dependability, and ease of use. Please visit our website to check out the entire **Marine** lineup and to view our trade show [schedule](#).

BRING IT ON.
